

Toilet champ

<https://play.google.com/store/apps/details?id=com.s5884.toiletcamp>

ToiletChamp is a fun app to count how many times you have been to restrooms and to show the ranking among ITPers.

This app has been made for the first trial to gather location-based data inside the ITP floor using iBeacon. This is a sort of draft app. In the future we will upgrade this project to establish a meaningful system collecting and analyzing indoor - location - based data. Don't miss it!

Seiya Kobayashi & John Choi

How to Use

- 1) Turn on Bluetooth
- 2) Keep running this app in background
- 3) Go to restroom with your phone! and will detect the iBeacons' radiowave automatically.

Requirements

- Android OS: 4.3 and later
- iOS 7.0 and later
- allow running in background
